### REASONS FOR ALLOWANCE

1. Claims 1-3, 6-24 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-3, 6-24, wherein the claimed invention comprises a multifocal spectacle lens, wherein distributions of surface power of said front surface and said back surface being different from each other, wherein an average surface power of an upper area of said front surface is greater than an average surface power of a lower area of said front surface, and wherein an average surface power of a lower area of said back surface is greater than an average surface power of an upper area of said back surface and a method for producing a multifocal spectacle lens comprising: producing semifinished lens blanks whose front surface is formed so as to be classified by at least one of spherical power, cylindrical power and addition power into a plurality of groups; selecting one of the semifinished lens blanks according to a customer's specification, the front surface of said one of the semifinished lens blanks corresponding to one of the groups to which said customer's specification belongs; and processing the back surface of said selected one of the semifinished lens blanks according to said customer's specification, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
